### **DETAILED ACTION**

This application was filed 3/25/2004 and is a Con of 10/209205 (7/30/02, US Patent #6770648) which is a CON of 09/606433 (6/28/2000, allowed) which claims benefit of Provisional Application 60/141672 (6/30/1999). Claims 9-14 have been canceled.

### ***Election/Restrictions***

1. Applicant's confirmation of the election with traverse by original presentation was confirmed in paper dated 2/8/2006. The traversal is on the ground(s) that the search would not pose a burden. This is not found persuasive because the search for group I does not overlap with the search for group II.

The requirement is still deemed proper and is therefore made FINAL.

2. This application contains claims 73-86 drawn to an invention nonelected with traverse in Paper No. 2/8/2006. A complete reply to the final rejection must include cancellation of nonelected claims or other appropriate action (37 CFR 1.144) See MPEP § 821.01.

### ***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

Art Unit: 1625

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 1-8, 15-20 and 55-72 remain rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. Specifically, it is not seen where the instant specification enables the ordinary artisan to make and/or use the instant compounds where X is other than  $-S(O)_k-$ ,  $-O-$ ,  $-C(O)-$  or  $CH_2$ . Other than these moieties, the specification does not enable the ordinary artisan to make or use the instant compounds. There are many examples within the instant specification, however the full scope of the instant claims are not enabled by the instant specification due to the scope of the instant X.

### *Double Patenting*

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double

Art Unit: 1625

patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. Claims 1-8, 15-20 and 55-72 remain rejected under the judicially created doctrine of double patenting over claims 1-33 of U. S. Patent No. 6620827 since the claims, if allowed, would improperly extend the "right to exclude" already granted in the patent.

The subject matter claimed in the instant application is fully disclosed in the patent (see claim 1) and is covered by the patent since the patent and the application are claiming common subject matter, as follows: The claims of the patent are fully encompassed by the instant claims. The instant claims where Ar1 is phenyl, X is S(O)k, Y is N(R12)-X(O)k and R2 is phenyl. This part of the instant claims is fully encompassed by claim 1 of US Patent 6620827.

Furthermore, there is no apparent reason why applicant was prevented from presenting claims corresponding to those of the instant application during prosecution of the application which matured into a patent. See *In re Schneller*, 397 F.2d 350, 158 USPQ 210 (CCPA 1968). See also MPEP § 804.

#### ***Claim Rejections - 35 USC § 102***

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

6. Claims 1-8, 15-20 and 55-72 are rejected under 35 U.S.C. 102(e) as being anticipated by US Patent 6620827

The applied reference has a common inventor(s) with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention "by another," or by an appropriate showing under 37 CFR 1.131. The instant application has a larger scope than is claimed by the patent.
